Stone Series

20 Year Finish Warranty

The background of the entire image is a detailed marble pattern. It features a complex network of dark, irregular veins and blotches of varying shades of gray and black, set against a lighter, off-white or cream-colored base. The pattern is organic and non-repeating, characteristic of natural stone or high-quality marble replication.

ARABESCATO
AC-10280

PERLATO SVEVO
AC-10290

A close-up photograph of a granite surface. The granite has a complex, mottled pattern with various shades of brown, tan, and black. The texture appears rough and uneven, with some areas showing more prominent crystalline structures than others. The lighting is somewhat uneven, highlighting the natural variations in the stone's color and grain.

YELLOW GRANITE
AC-10300

The image shows a close-up, high-resolution view of a granite surface. The texture is highly irregular and granular, with a mix of dark grey, black, and light grey tones. The surface appears to be composed of many small, angular mineral grains and larger, more distinct crystalline structures. The lighting is somewhat uneven, creating subtle gradients of grey across the surface, which emphasizes the three-dimensional quality of the mineral grains.
